

Dr. Hisham Badawi

DDS, MSc, PhD, MRCSEd, FRCD(C)

Dr. Badawi completed his DDS at the Jordan University, then his MSc at the Eastman Dental Institute, University College London. He acquired the fellowship of the Royal College of Edinburgh. He then took a teaching position as an assistant professor at the University of Manitoba, and then he started his PhD at the University of Alberta in Edmonton Canada. Dr. Badawi currently maintains a busy private practice in Calgary Alberta and is actively involved in orthodontic biomechanics research, he holds a part-time faculty position at the University of Alberta. His work offers some of the most ground breaking research ever seen in the field of orthodontics which will ultimately change the way orthodontics is perceived and practiced.
